HALL ESTILL
ATTORNEYS AT LAW

Healthcare

As healthcare changes dramatically, providers and third-party payors require advisors with broad healthcare regulatory, compliance, transactional, insurance, tax, employee benefits, antitrust and litigation experience. Our Healthcare Law practice covers corporate and finance issues, regulatory and compliance details, and litigation of negligence, breach of contract, malpractice and bad faith claims.

We serve hospitals, outpatient surgery centers, diagnostic testing facilities, nursing homes, physician groups, health insurance carriers and other organizations providing or financing healthcare services. In addition, we assist with matters of medical negligence involving long term care facilities, assisted living facilities, hospitals and physicians. Further, we continually monitor pending regulations affecting both institutional providers and individual professionals.

Finally, we assist doctors, dentists and other medical personnel in transactional matters such as contract review, employment and real estate matters.
