T.J. Mantooth has an intellectual property practice focusing on patent prosecution, including the drafting, enforcement, and defense of patent rights. Through his career, he has worked with inventors from a variety of technical and business realms regarding patents, trademarks, trade dress, copyrights, and trade secrets.

T.J. has drafted hundreds of patents in a wide range of engineering disciplines that include, semiconductor design, mobile electronics, robotics, petroleum exploration, oil refining, and pharmaceutical-grade manufacturing. Specifically, he has consulted with engineers to procure patents regarding circuit design, alternative power systems, solid state data storage, hybrid data memories with volatile and non-volatile components, remote control systems, pumping systems, and computer software.

T.J. has experience in consulting with sophisticated corporations as well as start-up companies concerning the development and valuation of intellectual property portfolios. He has worked extensively with evaluating and improving existing patent applications and issued patents. Further, he has been named a Rising Star in Intellectual Property Law by Oklahoma Super Lawyers.
